

Automatic Dumbbell Sample Making Machine

Picture is for reference only

Application:

Automatic Dumbbell Sample Making Machine is mainly used for plastic, organic glass and other non-metal materials tensile testing.

Feature:

Automatically milling dumbbell shape and plane process, using special cambered surface fixture to process the tubing dumbbell shape sample, can matching cleaner to clear away the chippings, keep the good environment.

Technical parameter:

Model	HS-5012
Maximum milling dumbbell shape length	250mm
Specification of Processing dumbbell shaped plane cutting tool	$\phi 30 \times \phi 12 \times 30 \text{mm}$
Overall dimension	600×600×500mm

Milling dumbbell cutter speed	2800 r/min
Milling feed speed	0~180mm/min
Milling dumbbell shape motor	180W
Dumbbell shape feed motor	60W
Application:	Used for plastic, organic glass and other non-metal materials tensile testing.
