

HST-ZYJ-60 Automatic Dumbbell Sampling Machine

HST Group Co.,LTD.

Development Base of Advanced Testing Machine Of China

Application:

This machine is mainly used for processing standard specimens for tensile test of non-metallic materials such as plastics and plexiglass. The machines can automatically milling dumbbell-shaped and plane-shaped samples of pipe and plate.

Technical Standard:

GB8804.2-2003 Types I and II

GB8804.3-2003 Types I and II

GB/T1040-92 I and II

ISO527-2 IA IB IBA 5A

Technical Parameters:

- 1 Maximum Milling Dumbbell Length: 200 mm
2. Machining Dumbbell Flat Tool Specification: 27 *12* 30 mm
3. The shape of the whole machine is 600 * 600 * 500 mm
4. Speed and speed of each part:
Milling Dumbbell Milling Cutter Speed 1400 r/min
5. Motor power:
Milling Dumbbell Motor 370W
Dumbbell Feed Motor 60W
6. Sample Thickness: 1-30mm
7. with type II template (or according to customer requirements)
