

HARTIP 1900 Portable Integrated Leeb Hardness Tester

The picture is for reference only

HARTIP 1900 hardness tester is a portable integrated Leeb hardness tester that is specially designed to measure hardness of castings in HL (Leeb), HRB (Rockwell B), HB(Brinell).

It has more impact energy (90N) and large contact tip (dia.5mm) than normal. Therefore it can make test on machined surface or even roughness surface instead of polished or finished surface.

It is widely used for measuring hardness of large castings or raw materials at spot.

The HARTIP 1900 can make test at any angle without making setup for different impact direction. All readings can be downloaded to computer or printed out to microprinter wirelessly by Bluetooth.
