

HST-ICCT45 Aluminum Hose Internal Coating Continuity Tester

Picture Just for reference

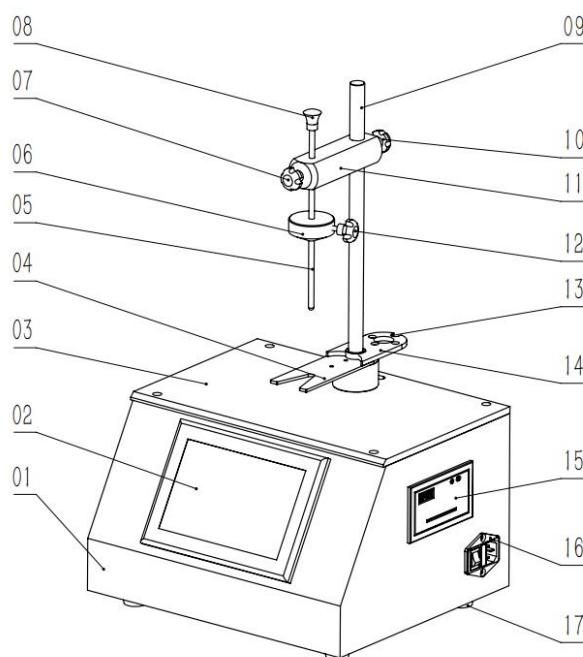

Product Introduction

HST-ICCT45 aluminum hose inner coating continuity tester is designed and developed according to the relevant standard requirements for inner coating continuity in YBB00162002-2015 "Aluminum Medicinal Ointment Tube". It can complete the coating continuity test of various aluminum tubes with inner coating. It can meet the experimental needs of quality inspection, scientific research, and production.

Technical parameters

Test diameter	$\phi 10 \sim \phi 45 \text{mm}$
Test height	10~250mm
Test voltage	DC 5V (other voltages available)

Resolution	0.1mA
Control display	Microcomputer control, LCD display
System language	Simplified Chinese/English
Dimensions	580(L)×600(B)×1420mm(H)
Net weight	About 35kg
Environmental conditions	Indoor temperature (20±10)°C, relative humidity <85%
Power supply	220V 50Hz

01 Electrical box 02 Display screen 03 Table 04 Base electrode 05 Sliding electrode
06 Positioning seat 07 Fixing knob 08 Test negative electrode 09 Lifting guide rod
10 Crossbar knob 11 Crossbar 12 Positioning knob 13 Test positive electrode
14 Insulation sheet 15 Printer 16 Power supply 17 Rubber leg
